

STEM REVISION

Our colleagues have been working hard to pull together a suite of high quality activities for you to engage with during these current circumstances. We can't wait for you to get involved!

WHAT'S ON OFFER?

The STEM (Science, Technology, Engineering, Maths) Response Team are creating a series of **online support and revision sessions** for students, ranging from **GCSE to A-Level**. The sessions will vary from generic subject-specific revision sessions led by the University's academic professionals and graduate teaching assistants, who will cover crucial aspects and key highlights of topics including Biology, Physics, Chemistry, and Maths.

Other sessions will be focused on non-subject related skills, including **top tips** for studying and note-taking, organisation skills and time management, what to expect when transitioning to Further/Higher education, and developing resilience based skills such as motivation and stress.

RESOURCES

The videos covering these topics will be made available to you within the following weeks:

- **27-07-2020: Study Skills**
- **03-08-2020: Biology**
- **10-08-2020: Physics**
- **17-08-2020: Maths**
- **24-08-2020: Chemistry**
- **31-08-2020: Transition to HE**

HOW TO ACCESS

The videos can be found by following the link below, click onto the calendar document, and you can search for these events and you will find up-to-date information on these activities and others.
